

# coffed

MANUFACTURER OF COFFEE ROASTERS

## SR3 Coffee roaster

Capacity per hour  
**up to 12 kg/h**

Heating type  
**LPG/Natural gas**

Typical roast time  
**8-20 min**

Gas pressure  
**50-80 mbar**

Recommended  
batch size  
**1-3 kg**

Supplied Voltage  
**1x230 VAC**

- Double walled drum
- Coffee and exhaust temperature sensors
- Stainless steel cover
- Fully modulated burner

## SR5 Coffee roaster

Capacity per hour  
**up to 20 kg/h**

Heating type  
**LPG/Natural gas**

Typical roast time  
**8-20 min**

Gas pressure  
**50-80 mbar**

Recommended  
batch size  
**3-5 kg**

Supplied Voltage  
**1x230 VAC**

- Double walled drum
- Coffee and exhaust temperature sensors
- Stainless steel cover
- Fully modulated burner
- Variable speed control on the drum and exhaust fan

## SR25 Coffee roaster

Capacity per hour  
**up to 100 kg/h**

Heating type  
**LPG/Natural gas**

Typical roast time  
**8-20 min**

Gas pressure  
**50-80 mbar**

Recommended  
batch size  
**15-25 kg**

Supplied Voltage  
**3x400 VAC**

- Double walled drum
- Coffee and exhaust temperature sensors
- Stainless steel cover
- Variable speed control on the drum and exhaust fan
- Fully modulated burner
- PLC controls with 10inch touchscreen
- Automatic and manual roasting mode
- Profiling and recipe storage

## SR60 Coffee roaster

Capacity per hour  
**up to 240 kg/h**

Heating type  
**LPG/Natural gas**

Typical roast time  
**8-20 min**

Gas pressure  
**50-80 mbar**

Recommended  
batch size  
**45-60 kg**

Supplied Voltage  
**3x400 VAC**

- Double walled drum
- Coffee and exhaust temperature sensors
- Stainless steel cover
- Variable speed control on the drum and exhaust fan
- Fully modulated burner
- PLC controls with 10inch touchscreen
- Automatic and manual roasting mode
- Profiling and recipe storage

Coffed was founded in 2008. At first we looked for clients interested in industrial packaging machines, and worked as a broker between purchasing and sales. 2009 was a turning point for us, as we realized the first project of refurbishment and delivery of machines for the company Mokate in Żory. Everything went fast from that moment on. The market appreciated the knowledge and experience of our employees which in result allowed us to build a 799-square-meter specialized hall serving both as a warehouse and a workshop. Inside, we created a modern plant for refurbishing coffee roasting machines, which we have used ever since.

## We are always on the move

We realize just how dynamic the market is and that technology goes forward every day. That is why Coffed believes in investments into advanced machines for steel processing and equipment that gives us the possibility of designing and manufacturing our own coffee roasters. Thanks to constant investments, we managed to refurbish and sell over 60 coffee roasting machines to customers from around the world. Photos of the different projects are available in realizations tab. Due to the dynamic development of our company and necessity of purchasing next steel processing machines, we decided to expand the company. We are planning to add extra workshop rooms and another warehouse to the existing building, 400 and 1100 square metres respectively. The building process is to begin in May 2017.

## Our Team is our recipe for success

Currently, Coffed employs 26 people, who know their job like nobody else. It is their talent and experience that back up our success. We also have our own R&D department where qualified professionals, designers and automatics engineers think how to make the company even better.

## We haven't had the final say

Despite clients' recognition, we are not staying in one place. In 2017 we introduced onto the market our own project - SR25 - an innovative coffee roaster, which allows the user to adjust its slightest details of work. Our R&D is also developing new 5 and 60-kilo-per-batch roasters. The manufacture and sale of these machines are to be launched in 2017.

## Manufacture and education

Apart from production and sales of coffee roasting machines, we offer our clients trainings, consulting and technical support on the matters related to the use of our products. Contact us today and see just how much we have to offer you. You are welcome to visit our company and have a look at how hard we work to provide our clients with amazing coffee roasters.
